IT Policies – Himanshu Pvt Limited

1. Introduction

The IT policies at Himanshu Pvt Limited ensure secure, efficient, and responsible use of technology resources. These policies apply to all employees, contractors, and interns using company-provided IT assets, software, or networks.

2. IT Acceptable Use

- Company IT resources, including computers, networks, and software, are to be used for business purposes.
 - Limited personal use is allowed if it does not interfere with work responsibilities or violate company rules.
 - Employees must avoid using IT resources for illegal activities, including piracy, unauthorized access, or distribution of inappropriate content.
 - Any violation of acceptable use may result in disciplinary action.
-

3. Hardware Policies

- Company-provided hardware includes laptops, desktops, mobile devices, and peripherals.
 - Employees are responsible for the safe and secure use of these devices.
 - Loss or damage must be reported immediately to IT support.
 - Unauthorized modification or installation of hardware components is prohibited.
-

4. Software & Licensing

- Only authorized software approved by the IT department may be installed on company devices.
 - Use of pirated or unlicensed software is strictly prohibited.
 - Regular updates and patches must be installed promptly to maintain security.
 - Employees should not attempt to bypass software licensing mechanisms.
-

5. Password & Authentication Policies

- All accounts must have strong, unique passwords. Minimum 12-character passwords combining letters, numbers, and special symbols are recommended.
 - Passwords must not be shared with others or written down in insecure locations.
 - Two-factor authentication (2FA) is mandatory for sensitive systems and remote access.
 - Passwords must be updated at least every 90 days or as mandated by IT.
-

6. Network & Internet Usage

- Company networks are for business purposes only. Personal browsing should be limited and not interfere with work.
 - Downloading or uploading illegal, malicious, or copyrighted content is strictly prohibited.
 - Unauthorized network devices, such as personal routers or hotspots, must not be connected to the company network.
 - VPN usage is required for secure remote access to internal systems.
-

7. Email & Communication Systems

- Company email accounts should be used professionally and primarily for business communication.
- Avoid sharing sensitive information without encryption.

- Employees should not open suspicious emails, attachments, or links.
 - Spamming, phishing, or mass email forwarding is prohibited.
-

8. Data Security & Confidentiality

- Employees must protect sensitive company and client data.
 - Data should only be stored on company-approved systems.
 - Confidential information must not be shared externally unless authorized.
 - In case of a security breach, employees must report it immediately to IT security.
-

9. Remote Work & BYOD (Bring Your Own Device)

- Remote access to company systems requires VPN and secure authentication.
 - Personal devices may be used for work only with IT approval and security compliance.
 - All remote work must adhere to company IT security policies.
 - Employees must ensure secure storage of company data on personal devices.
-

10. Incident Reporting

- All IT-related incidents, such as malware infections, system crashes, or data loss, must be reported immediately.
 - IT support will provide assistance and mitigation steps.
 - Employees are expected to cooperate in investigating and resolving IT incidents.
-

11. Backup & Data Retention

- Critical business data must be regularly backed up to company-approved storage systems.
 - IT department manages automated backup processes, but employees should ensure their work is saved appropriately.
 - Data retention policies comply with legal and business requirements.
 - Deletion of files must follow approved procedures to prevent accidental loss.
-

12. Software Development & Usage Policies

- Internal software developed by employees must follow secure coding standards.
 - Open-source software use must comply with licensing rules.
 - Testing, staging, and production environments must be strictly separated.
 - Any vulnerabilities discovered must be reported to IT security immediately.
-

13. Cloud Services & Third-Party Applications

- Company-approved cloud services must be used for collaboration and storage.
 - Use of unapproved third-party apps or cloud services is prohibited.
 - Sensitive data must not be uploaded to personal or public cloud accounts.
 - Access permissions must be reviewed regularly to maintain security.
-

14. Mobile & Remote Device Management

- Company mobile devices must be secured with passwords or biometrics.
- Lost or stolen devices must be reported immediately.

- Remote wipe and device tracking will be used for security purposes.
 - Personal apps on company devices should not interfere with business operations.
-

15. Compliance & Legal Requirements

- IT policies comply with all applicable laws, including data privacy and cybersecurity regulations.
 - Employees must follow all policies to avoid violations that could lead to legal or financial penalties.
 - Periodic audits will be conducted to ensure compliance with internal and external regulations.
-

16. Employee Training & Awareness

- Employees must complete mandatory IT security and compliance training annually.
 - Awareness programs on phishing, password security, and safe internet usage will be provided.
 - Employees are encouraged to report any suspicious activities or security concerns proactively.
-

17. Policy Violations & Disciplinary Actions

- Violations of IT policies may result in disciplinary action, up to and including termination.
 - Minor infractions may receive warnings or retraining, depending on severity.
 - Repeated or intentional violations will be escalated to management and HR.
-

18. Policy Review & Updates

- IT policies are reviewed annually to adapt to technological changes and security threats.
 - Employees will be notified of any updates and may be required to acknowledge changes.
 - Suggestions for policy improvement may be submitted to the IT department at any time.
-

19. FAQs (Optional Section for RAG Testing)

- Can I install personal software on my company laptop? → Only with IT approval.
 - What should I do if I forget my password? → Reset it via the IT portal or contact IT support.
 - How do I access the company VPN? → IT will provide setup instructions and credentials.
 - Who do I contact for IT issues? → IT support team is the point of contact for all technical problems.
-

20. Leave & Work Hours (IT-Specific)

- IT employees are entitled to the same leave benefits as defined in the HR policies (annual, sick, casual leave).
- Due to critical system support, IT teams must ensure **coverage during business hours** and scheduled maintenance windows.
- Leave requests must be submitted **at least 7 days in advance**, except for emergencies.
- For on-call or night-shift IT staff, leave approvals require **coordination with the IT manager** to ensure system coverage.
- Unplanned absences must be communicated immediately to the IT manager and team to arrange temporary coverage.
- Remote work is allowed per company IT and HR policies, but employees must remain available for urgent system issues if required.
